To secure a position in a company that values growth and innovation where I can utilize my development experience while also having opportunities to enhance my knowledge and skills as a developer.

---

## SUMMARY OF QUALIFICATIONS

---

- 6+ years of work experience developing, maintaining, and supporting web and desktop applications using various technologies including, C#, Winforms, ASP.NET, Javascript, React, HTML5, CSS, Bootstrap, and SQL databases
  - 2 years of experience contributing to the design and development of software built using the SOA design pattern
  - Possess strong knowledge of the SDLC life cycle and working with the agile methodology
  - Experience providing support and training to clients and colleagues on business applications
  - Proven ability to quickly learn new concepts and proactively research and implement solutions to complex problems with minimal supervision
- 

## EMPLOYMENT HISTORY

---

### Full Stack Developer

May 2019 – Present

University Health Network  
700 Bay Street, Toronto ON

- Develop and provide ongoing maintenance for software components for the RIS desktop application built with the SOA design pattern using NHibernate in conjunction with the .NET framework
- Involved in the successful UI redesign of the Viewer web application using HTML5, Materializer Inputs framework, and Bootstrap
- Perform tests and document all internal application components
- Participate in designing, coding, testing, debugging, and configuring software

### IT Software Developer

Feb 2018 – Apr 2019

CBI Health Group  
3300 Bloor St W, Suite 900 West Tower, Etobicoke ON

- Working in a .NET environment using C# Winforms and MS SQL Server for the main desktop application and C# UWP for the Windows Mobile app
- Main responsibilities involved developing new features and fixing existing functionality for both the desktop and mobile app
- Developed a scheduling extension for the main desktop application that allowed users to schedule all appointment details in one location
- Made various improvements to the UI of the Windows app

**C# .NET Developer**

July 2016 - Feb 2018

Rad-Logic Inc.

600 Sherbourne Street, Suite 805 Toronto ON

- Develop new and improve existing functionalities on the Voice Recognition (VR) Windows application
- Took part in the design and testing of feature upgrades to the VR application
- Provide on-site and telephone support for the VR application
- Provide on-site training to Radiologists and support staff on the uage of the VR application whenever new features are rolled out
- Recently completed developing a module for the VR application which is in the final stages of QA testing; this module enables Radiologists to view and manage cases that have already been dictated

**Programmer Analyst**

Jan. 2014 - July 2016

KUBRA

5050 Tomken Rd, Mississauga, ON L4W 5B1

- Developed, debugged, tested and troubleshooted KUBRA products and solutions as part of client requirements
- Implemented application amendments, data edits, and cosmetic re/designs, sometimes involving rewriting and adding whole new application functions and procedures using web technologies such as C#, ASP.NET, ADO.NET, javascript, HTML5, CSS, and SQL database manipulation
- Oversaw the analysis, design, implementation, and testing of project deliverables
- Frequently received commendations from clients for handling escalations and completing work assignments on schedule and with high standards of quality and efficiency
- Mentored and helped train junior members on the team

**Web Developer**

Sept.-Dec. 2013 (Coop)

Independent Electricity System Operator (IESO)

2635 Lakeshore Rd W, Mississauga ON

- Assisted with the migration of content from classic asp-based webpages to the new Sharepoint-based website
- Reproduced dynamic asp pages within the Sharepoint framework using javascript, jQuery, CSS3, HTML, and XSLT
- Debugged and implemented fixes for existing content in both the development and production sites
- Developed a webpage-embedded calendar tool to more efficiently handle access to various documents

---
